Low VOC

Product Information

75 µm double-sided, tackified acrylic adhesive tape with PET scrim for mounting and lamination applications in automotive interiors

Product Description

tesa[®] 75007 is a conformable, tackified acrylic adhesive tape with a thickness of 75 µm, reinforced by a PET scrim. This tape has especially been developed for all kinds of demanding lamination and mounting applications. It shows a high humidity resistance and edge repulsion resistance. Due to its low VOC property it is particularly designed to meet automotive interior requirements.

tesa[®] 75007 is suitable for laminating all kinds of foam, fleece, and felt substrates and mounting light interior components.

This product is also available in 130 µm (tesa[®] 75013).

Product Features

- Highly conformable to follow difficult 3-D shapes
- Low VOC (acc. GB 27630) – no critical substances detectable
- Reinforcement supports converting efficiency
- Very good humidity resistance
- High initial tack and excellent repulsion resistance
- Secure mounting even to nonpolar plastics (PP) and composites (recycled materials)
- Very good initial adhesion to a wide variety of interior substrates

Application Fields

tesa[®] 75007 is suitable for mounting and lamination applications.

Example applications are:

- Mounting of light interior trims (plastics, LSE surfaces)
- FPC (flexible printed circuits) mounting
- Lamination of insulation materials
- Laminates for NVH (noise, vibration, and harshness) and BSR (buzz, squeak, and rattle) prevention
- Lamination of decorative fabrics
- Lamination of foam for HVAC (heating, ventilation, and air conditioning) seals
- Mounting of flooring systems
