

Reliable, durable,
and visible

Our safety tape assortment

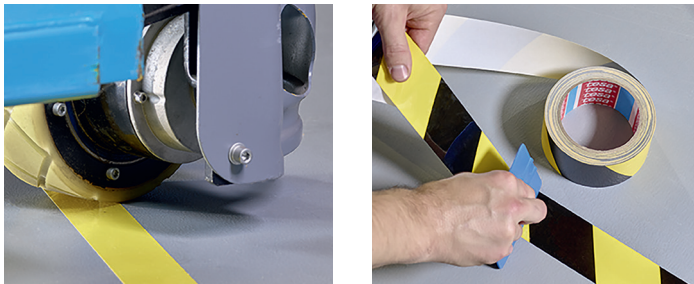

Our safety tape assortment

Marking, warning, and anti-slip tapes are helpful tools to structure our workplaces and make them safer. Our brightly colored tapes are highly visible for easy identification in areas of safety concerns and for warning purposes – the perfect solution to complement 5S manufacturing initiatives. This brochure will help you to select the product most suited to your individual needs.

By using our products, you will benefit from:

- A wide range of solutions for even the most demanding applications
- Stable and reliable quality that has been proven time and time again
- Technical customer service by experienced and highly skilled engineers

Marking and warning tapes

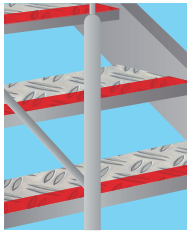

For permanent marking and warning applications, you need highly visible and mechanically stress-resistant tapes. Different colors make the guiding easier to understand. Particular places like fire extinguishers or first-aid stations require eye-catching marking. Different laws, guidelines, and certifications also require areas to be marked off to create a safe work environment.

Product	Features and description	Backing	Total thickness without liner [μm]	Adhesion to steel [N/cm]	Tensile strength [N/cm]	Elongation at break [%]	Color
		Adhesive					
tesa® 60960	Anti-Scratch PET Floor Marking Tape <ul style="list-style-type: none"> • For permanent, highly durable, and abrasion-resistant marking for high-traffic, heavy-duty areas like factories, warehouses, offices, or hospitals • Protective PET top layer ensures long lifetime and permanent bright colors that don't wear off over time • Good adhesion to various smooth surfaces • Silicized paper liner allows tape to be positioned first, making it easy to achieve straight lines over long distances 	PET/PP laminate	175	4.5	175	140	
		Synthetic rubber					
tesa® 4169	Permanent Marking Tape <ul style="list-style-type: none"> • For permanent and heavy-duty marking for high-traffic areas, including forklifts • Robust and resistant PVC backing, hand-tearable • Flexible backing to cope with curves • Good adhesion to various surfaces 	Soft PVC	180	1.8	30	200	
		Acrylic					
tesa® 60760	Marking Tape <ul style="list-style-type: none"> • For temporary and low-duty marking for mobile and stationary objects, for example • Resistant PVC backing, hand-tearable • Good adhesion to various surfaces 	Soft PVC	150	2.0	33	220	
		Natural rubber					

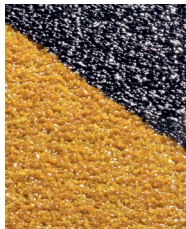

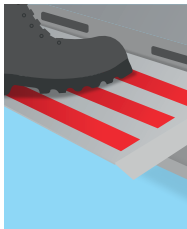

2 Applications

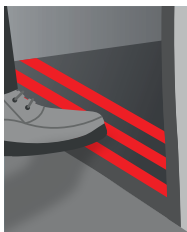

Anti-slip tapes

tesa® 60955 Anti-Slip Tape Conformable, is designed to adhere to tread plates and other irregular surfaces where good grip and safe footing is required. The backing consists of an aluminum carrier coated with mineral particles, making the anti-slip tape exceptionally conformable. The bright-yellow and black-and-yellow-striped tapes are highly visible for easy identification in areas of safety concerns and for warning purposes.

tesa® 60954 Anti-Slip Tape Heavy Duty, has been specifically developed for permanent heavy-duty applications, such as construction vehicles or platforms and ramps. The highly durable backing consists of a PVC film coated with large mineral particles to provide extra slip resistance for extreme conditions. The bright-yellow and black-and-yellow-striped tapes are highly visible for easy identification.

tesa® 60950/51/52 Anti-Slip Tape is designed for applications like industrial floors where good grip and safe footing is required. The durable backing consists of a PVC film coated with mineral particles, combined with an acrylic adhesive for secure bonding to most surfaces.

Product	Features and description	Backing	Total thickness without liner [µm]	Adhesion to steel [N/cm]	Elongation at break [%]	Temperature resistance [°C]	Color
		Adhesive					
tesa® 60955 	Anti-Slip Tape Conformable <ul style="list-style-type: none"> High conformability for excellent adhesion to tread plates and other irregular surfaces Mineral particles-coated backing ensures good grip and safe footing Bright yellow and black and yellow stripes ensure strong visibility for easy identification Anti-slip certification R13 according to DIN 51130 	Aluminum carrier coated with mineral particles	700	8	12	120	
		Acrylic					
tesa® 60954 	Anti-Slip Tape Heavy Duty <ul style="list-style-type: none"> Highly durable backing with extra slip resistance for applications in extreme conditions, e.g. construction vehicles or platforms and ramps Reduced clogging due to coarse particles Bright yellow and black and yellow stripes ensure strong visibility for easy identification Anti-slip certification R13 according to DIN 51130 (R12 for black-yellow) 	PVC film coated with large mineral particles	1,185	7	35	80	
		Acrylic					
tesa® 60950/51/52/53 	Anti-Slip Tape <ul style="list-style-type: none"> Durable and slip-resistant backing for applications such as industrial flooring Good adhesion for secure bonding to most surfaces Anti-slip certification R13 according to DIN 51130 tesa® 60953 glows in the dark for up to 20 minutes 	PVC film coated with mineral particles	720	5.8	25	50	
		Acrylic
