

tesa® 60257

Product Information

250µm double sided grey electrically conductive woven tape

Product Description

tesa® 60257 is a grey double sided electrically conductive self adhesive tape. It consists of an electrically conductive woven backing and an electrically conductive acrylic adhesive.

Product Features

- Thickness: 250μm
- · Excellent electrical conductivity in XYZ-direction even at high temperatures and humidity
- · Good adhesion level even at harsh environmental conditions
- · Tear resistant backing which provides very good dimensional stability

Application Fields

- · EMC applications, such as grounding
- Electrostatic discharge applications

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Product Construction

•	Backing	conductive woven	•	Color	gray
•	Type of adhesive	conductive acrylic	•	Color of liner	white/blue logo
•	Type of liner	PE-coated paper	•	Thickness of liner	120 μm
•	Total thickness	250 μm			

Properties/Performance Values

•	Contact resistance z-direction	0.05 Ohm / square •	Static shear resistance at 40°C low
	(initial)	inch •	Surface resistance x-y-direction 0.2 mOhm
•	Release of liner	easy •	Temperature resistance short 160 °C
•	Static shear resistance at 23°C	medium	term

Adhesion to Values

• Steel (after 14 days) 10.8 N/cm
