

Elevating process efficiency with tesa® Softprint neXt

Our new plate mounting solution offering neXt level performance throughout the whole process

Introducing tesa® Softprint neXt

When developing plate mounting tape that can keep up with the quality and efficiency demands of the flexo printing market, our technical experts focus on three key performance areas and the product solutions used to address each of them.

- 1 Fast tape and plate mounting
- 2 Uninterrupted print runs with securely mounted plates
- 3 Smooth and easy plate and tape demounting

To optimize these key attributes requires an adhesive that addresses the following:

- A relatively low tack, allowing for repositioning plates if needed
- Secure and strong bond to keep plate edges down, even during long press runs
- Easy release of plates and tapes to ensure efficiency and avoid damaging plates

What sounds like contradicting properties can now be achieved with tesa® Softprint neXt. Keeping the mounting and secure bonding properties you already trust, with a new and improved plate-side adhesive to ensure an easy demounting process.

For flexo printers, process efficiency is of utmost importance to achieve targets and meet deadlines. Shorter print runs, quicker turnaround times, and higher speeds are in high demand, and our extensive assortment of tesa® Softprint plate mounting tapes is constantly evolving to fulfill all market needs.

tesa® Softprint neXt main benefits at a glance

Mounting

Low tack for easy plate repositioning and fast mounting processes

Printing

Outstanding performance against plate edge lifting for uninterrupted print runs

Demounting

Innovative plate side adhesive for easy removal avoiding damage to the printing plate NEW

With our tesa® Softprint neXt you will achieve the overall process efficiency you are looking for, saving valuable time during tape and plate mounting and demounting, avoiding machine downtime during printing, and preventing damaged plates upon demounting so that they are ready for future use – saving time and money.

tesa® Softprint neXt assortment

Adhesive line	Core design	X-Soft	Soft	Medium	Medium-Hard	Hard	X-Hard
tesa® Softprint neXt FE	Flex	-	73422	73424	73426	73428	-
tesa® Softprint neXt FE-X	Flex	-	73522	73524	73526	73528	73529

Please check with your local tesa sales representative for different liner availabilities (standard embossed liner or structured 'EA' liner)

Our structured 'easy application' (EA) liner design

Experience our tesa® Softprint EA liner for extra smooth mounting:

- Unique liner structure **helps air escape** during mounting & printing
- Air escape supports **easier manual mounting**
- Clear liner allows user to **see air bubbles**

tesa® products prove their impressive quality day in, day out in demanding conditions and are regularly subjected to strict controls.
