|  | at require monitoring at the workplace:    |

- · Additional information: The lists that were valid during the compilation were used as basis.
- · Exposure controls
- Personal protective equipment
- Breathing equipment: Not required. Protection of hands: Not required. · Material of gloves Suitability and resistance of a glove depend on the conditions of use, such as frequency and duration of contact, chemical resistance of the glove material, thickness and fit of the gloves. As a general rule, the glove manufacturer should be consulted for the necessary information. Contaminated or damaged gloves should be replaced immediately. · Penetration time of glove material The exact breakthrough time must be obtained from the protective glove manufacturer and must be observed. · Eye protection: Not required.
