

# Make recyclable packaging completely recyclable

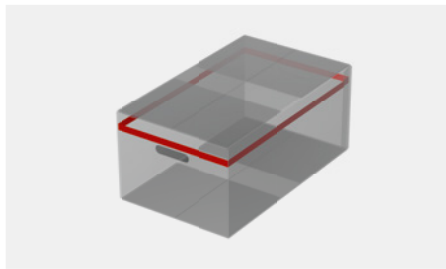

tesa® paper-based design tapes for corrugated and board material boxes and envelopes

Our range of more sustainable design tapes provide an alternative for opening, closing, and reinforcement of board material packaging. Meeting demands for sustainability and high performance, they make it easy to create packaging that is completely recyclable.

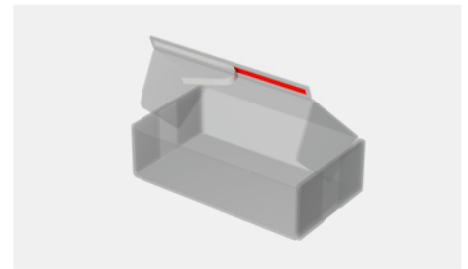

For ease, our adhesive tapes have been developed to integrate seamlessly with your current processes.

tesa® 51344 for packaging opening

tesa® 51345 for packaging reinforcement

tesa® 61346 for packaging closing

At tesa, we want to increasingly use our expertise to develop products with a contribution to sustainability. Our paper-based design tapes tick the following boxes when it comes to sustainable aspects:

- Recyclable: disposable with the board material (Cepi recyclability laboratory test method, version 2)
- Paper backing from sustainably managed sources
- Solvent-free coating process
- 100% recycled paper core

## Main product benefits at a glance

### Meet sustainability targets

Recyclable tapes made with more sustainable product components to reduce film content in final packaging

### Proven processability

Smooth unwinding and proven processability on market-standard applicators

### Reliable performance

Strong paper backing and high adhesion on relevant substrates ensures high performance

### Aesthetic appeal

A pleasing visual appearance for your final packaging, approved by leading box design centers

### Solutions without compromise

Our paper-based range of design tapes enables recyclable and secure pack opening, reinforcement, and closing. Each solution has been through our rigorous testing processes to ensure every roll performs to the very highest standards, every single time.

All tapes can be applied in-line during the corrugated board manufacturing process which was successfully tested on market-leading applicator systems. During packaging processing and finishing, they can also be applied with off-line market standard applicator systems.

### Driving sustainability together

Our tapes are externally certified for their recyclability. This enables you to offer your customers packaging that is recyclable, even if the tape is not removed before disposal. By using more sustainable components and enabling recyclability, we achieve shared sustainability goals.

Contact your tesa sales representative today with your individual requirements to sample our packaging design tapes.
