- For gjenstander på opptil 1 kg\*\* per strimmel
- Kan fjernes uten å etterlate merker\* Kun for bruk med en limspiker

\*

- For optimale resultater må du lese instruksjonsheftet.

### Applikasjon

How to apply – Step by step1. Get the most out of an Adhesive Strip by cleaning the surface of dirt and dust with a dust-free cloth.

2. The Adhesive Strip for Wallpaper & Plaster should be applied to the rougher surface first. So when it comes to wallpaper or plaster, always apply it to the wall, with the blue tab facing the wall. Before using a strip, make sure that your surface is strong enough to take the weight of the object you want to attach.

3. Press down evenly over the entire strip for at least 5 seconds, and only then remove the protective foil. Pressing down like this activates the flexible polymer chains that form U-shaped links with the surface. It's these links that give such a secure and reliable bond, so the harder and more evenly you press, the better the bond.

4. Now apply the tesa® Adhesive Nail by aligning it on the top edge of the strip, then folding it down. Press down evenly all over the entire nail for at least 5 seconds.

5. The tab should be left accessible below the nail for easy removal.
